NexxZr+ Multi 2.0 & Paint 3D monolithic
by Matej Luk

Sagemax experience

Initial situation

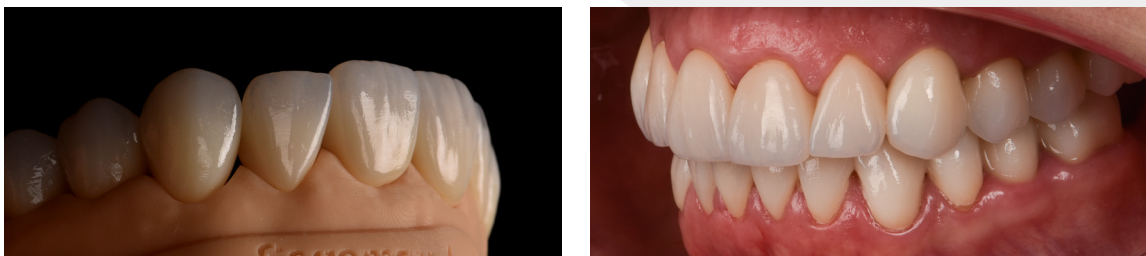

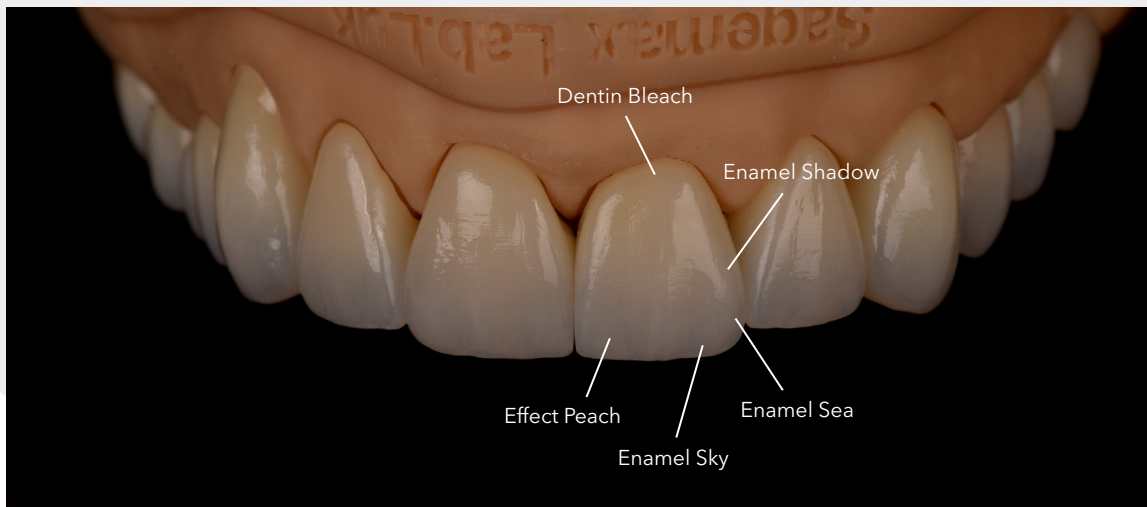

The initial situation was extremely unsatisfactory for the patient.

Restoration fabrication with NexxZr+ Multi 2.0

The monolithic restorations were fabricated using the highly translucent zirconia NexxZr+ Multi 2.0 A1.

Restoration finishing with Paint 3D

The restorations were characterized using the universal coloring system Paint 3D.

Final result

Before.

After.

The patient was overjoyed with her new smile. She gained not only a new smile but also a completely new quality of life.
