Sagemax experience

My first test of the new NexxZr+ Multi 2.0 zirconia disc

Beautiful color setting and good match to the shade guide.

#2

Outstanding translucency properties and lifelike esthetics.

My conclusion after the first three test restorations made of NexxZr+ Multi 2.0

The new NexxZr+ Multi 2.0 zirconia disc from Sagemax impresses with its outstanding quality, perfect color match and high translucency. Ideal for crowns and bridges, it offers all A-D and four Bleach shades, making it the perfect choice for esthetics enthusiasts. An absolute must for modern dental laboratories!
