NexxZr⁺ Multi monolithic
by Dr. Sameh Barsoum & Dr. Michael Emad

Sagemax experience

Initial situation and preparation

Initial situation of the patient: severe attrition and decay of anterior teeth.

Lower teeth prepared for crown work.

Upper teeth prepared for crown work.

Crown fabrication and cementation

Monolithic crowns made of NexxZr+ Multi A1. Stained and glazed with CERABIEN ZR FC (Co. Kuraray Noritake).

After upper and lower crowns placed and cemented.

Final result

Before.

After.

Beautiful final esthetic result and an extremely happy patient.
