NexxZr T monolithic
by Dr. Gonzalo Haro Pons & Alfonso Blanco

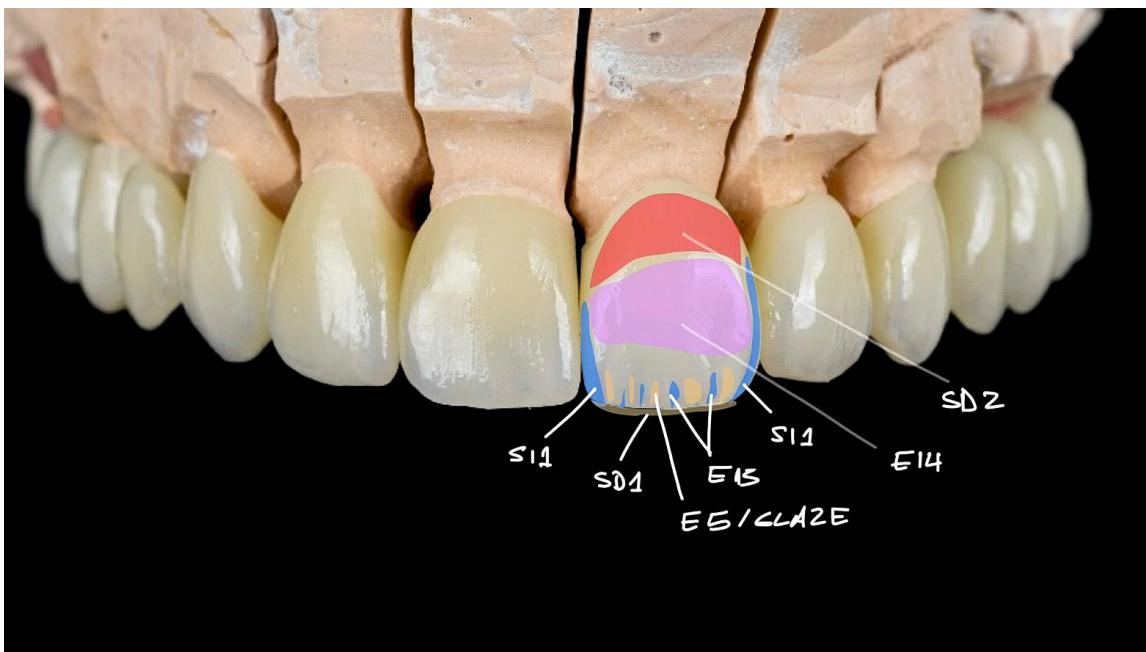

Sagemax experience

Initial situation and preparation

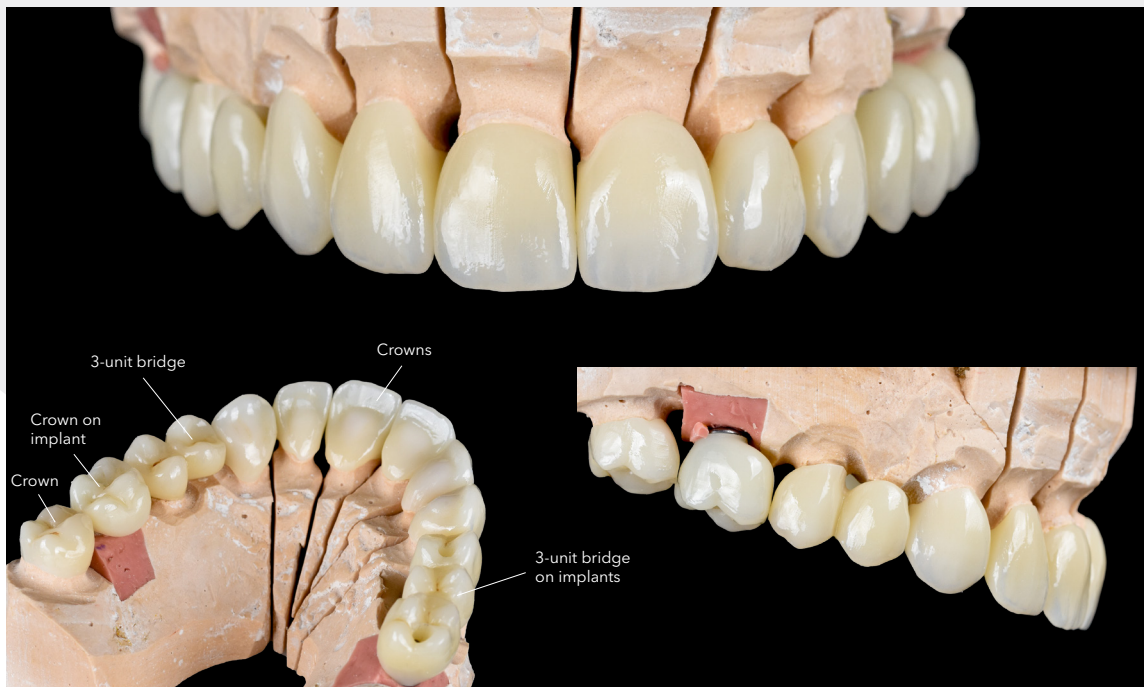

Initial situation of the patient, with old restorations in different shades. Goal: total restoration of the upper jaw.

Staining and glazing

Fabrication of monolithic restorations from NexxZr T with minimal staining and glazing with IPS Ivoclar (Co. Ivoclar).

Finished monolithic restorations and cementation

Finished monolithic restorations after staining and glazing on the model and after cementation in the mouth.

Final result

The crowns integrate beautifully into the oral cavity, giving the patient a radiant new smile.
