# Sagemax experience

Initial situation & framework design

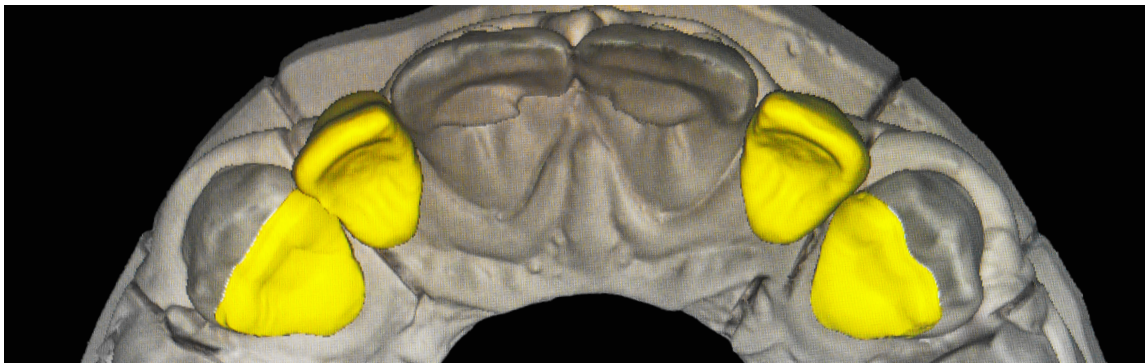

---

Congenitally missing maxillary lateral incisors.

Lateral view of the one-wing designed Maryland bridges.

Occlusal view of the one-wing designed Maryland bridges.

## Framework fabrication

---

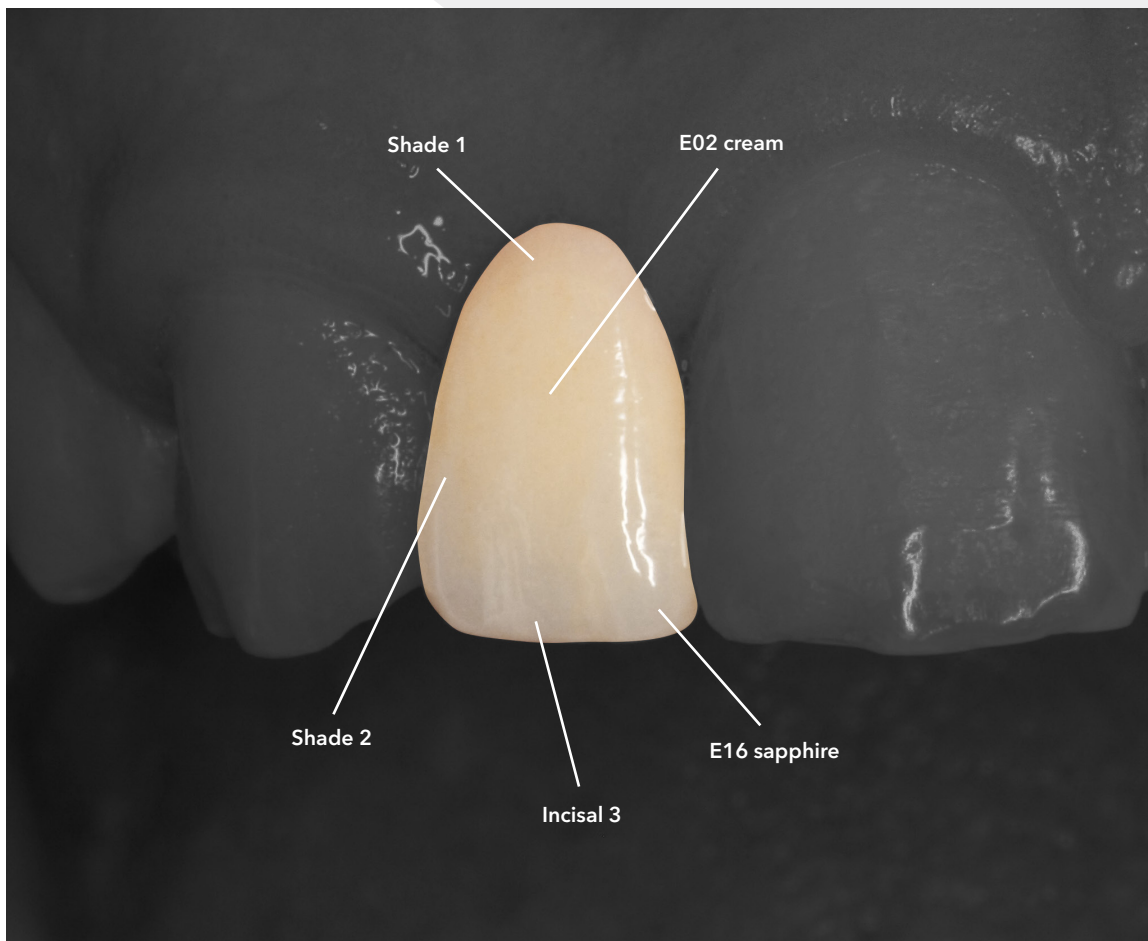

Fabrication of the monolithic one-wing Maryland bridges out of high-strength NexxZr T.

High translucency despite high strength.

## Staining protocol

---

Staining and glazing with IPS Ivocolor (Co. Ivoclar).

## Final result

---

The two one-winged Maryland bridges perfectly integrate into the surrounding oral situation and optimally conceal the missing incisors.
