PressCeramic micro-layered
by Merkialiunas Vitalius
& Dr. Nevrov Kirill

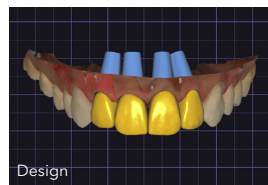

PressCeramic micro-layered
by Merkialiunas Vitalius & Dr. Nevrov Kirill

Sagemax experience

Initial situation, preparation & PMMA crowns

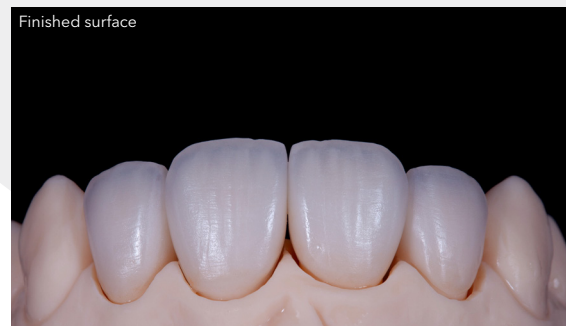

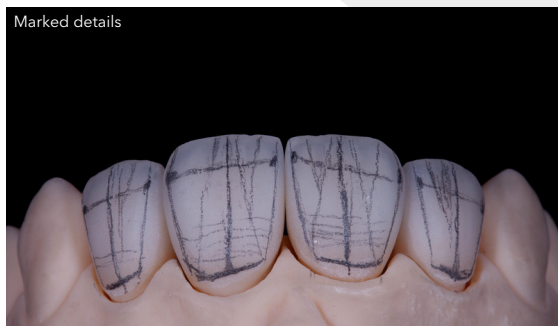

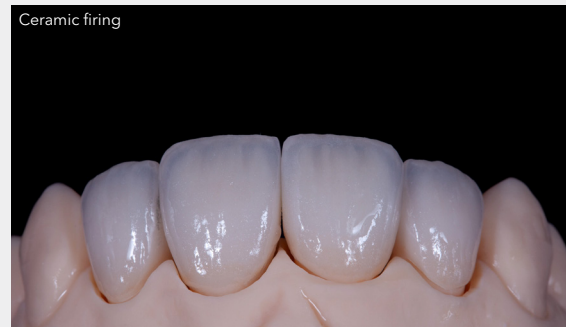

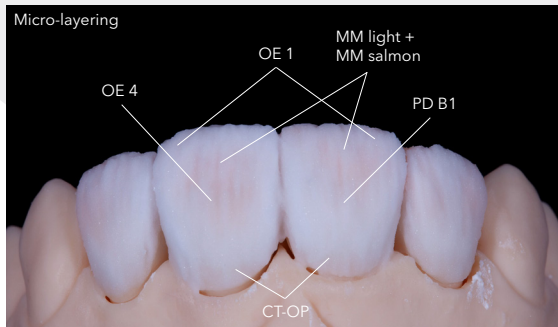

Framework fabrication

The frameworks were fabricated from lithium disilicate pressed ceramic (PressCeramic).

Micro-layering

Micro-layering was carried out with IPS e.max Ceram (Co. Ivoclar) layering ceramic.

Final result

The finished crowns seamlessly blend into the oral cavity, and the color matches perfectly with the adjacent teeth.
